

We have a small supply (100 each) of 3.9 x 48" phenolic airframes (\$18.95 each) and 3.9 x 48" couplers (\$17.95 each). If you've had a project in mind that could benefit from phenolic 3.9" tubing that's 48" instead of the standard 36", now's the time to get it! This is a special order run only, and we don't intend to have this length of 3.9" available again. See the Airframes section of the webstore to order these items while they last!

Also, as you may know we have discontinued our Stratus kit. However, we have (9) Stratuses left. The Stratus can be thought of as an altimeter-deployment Cirrus Dart type rocket (that's what it was originally designed for, to meet customer requests for modifying the Cirrus for altimeter ejection). They retail for \$52.95, but we have them on sale for \$45.00 each. They do require an altimeter (Adept ALTS25 or Transolve P4 or P5) for rear ejection deployment. Call Jerry at "PML Central" at 800-PUBLICM (orders only please) or 810-468-1748 9-5pm EST M-F to order a Stratus.
