

Hello, everybody. We've got a major announcement for you with this issue of PML News...

PML is proud to announce our line of Thrusters™ single-use 29mm motors and Rapidfire™ igniters! PML now provides “one-stop-shopping” for the midpower rocketeer with kits, igniters, and motors all in one place. We've combined the safety and reliability of the Aerotech rocket motor technology you're familiar with and the convenience and superior customer service of PML. We currently offer five F & G motors and delays, available singly or in three-packs, the F50-6T, G40-4W, G40-7W, G80-4T, G80-7T. Go to our new Rocket Motors page in the webstore for more information and to find out about the PML Rapidfire™ igniters included with each Thruster™.

Also, we've added a Warranty Policy page in case you have any questions as to PML warranty coverage. Nothing's really changed from the same great service we've provided you in the past, but now it's on a page for your review. Click on the PML Warranty Policy button on the main page for more details.

That's it for now. Thanks again for your support of PML!
