PML NEWS VOLUME 5 -- 12/27/98 -- "NEW P5 ALTITUDE CHART"

Attached is a new altitude readout chart to be used with our P5 Altimeter. Previously, a P5 user needed to look up a "conversion code" in a chart in the P5 instructions and do a multiplication to find out the altitude. The new chart attached is a direct conversion to feet with no multiplication needed. Simply find the number the P5 beeps out on the chart, and next to that beep code is your altitude.

We have revised our P5 instructions to remove the earlier conversion chart and related text. I have attached ONLY the new chart here to save bandwidth. If you wish to have a full set of the revised P5 instructions, email me and request "P5 Instructions Version 8". They are MS Word 97 format. There's really nothing significantly different in the new instructions other than the altitude chart stuff, but if you want 'em, I'll send 'em.

One last thing...there's no good way to distribute this information as an RTF file due to the formatting required. Therefore, it is attached as a Microsoft Word 6/95 file. If you are a P5 owner who does not use MS Word and your word processor doesn't successfully read the attachment, please email me with what word processor you use, and I'll see if I can convert the Word file to your format.
