### ***Another PML Motor Recommendations Chart Upgrade***

Hi, everyone. In the end of October we announced a huge upgrade to our popular Motor Recommendations Charts on the Specs Page at [www.publicmissiles.com](http://www.publicmissiles.com). Today we've got another update to the charts for you...Animal Works motors! We've added all 19 of AMW's 54mm motors to our charts for you. You'll find a new Animal Works motors only PDF for you on the Specs Page, and we've also blended the Animal Works motors into the PML Complete Motor Recommendations Chart for those of you who want 'em all in one spot.

With the addition of these 437 motor and kit combinations to our charts, we now offer our customers almost 2,800 motor and kit combinations with predicted altitudes and suggested delays! Of course we also added the new RockSim RKT files we used to run the simulations for the charts in our PMLRKTS.ZIP file on the RockSim Page of our site. What other manufacturer gives you that kind of support and ease-of-use? Nobody we know of...course it could be because we've got the best customers! Makes it easy for us to want to help.

Thanks again for your strong support of PML. We truly appreciate it!
