

PML Releases New LARGE Linear Launch Rail Lugs

Hi everyone! Due to the overwhelming popularity of our Linear Launch Rail Lugs, we've now released a LARGE version! Our new Large Linear Launch Rail Lugs (available on the Hardware Page of our webstore at www.publicmissiles.com) are perfect for the larger rockets in your fleet. As you're probably aware, most clubs are quickly phasing in launch rails as the preferred method over launch rods. Our regular-sized linear lugs have been very popular and are fast becoming the standard.

Check out the Hardware page at www.publicmissiles.com today and get some of our regular and new LARGE linear launch lugs!
